

How to calculate the belt measure

- The belt measure may amount to 3 meters max.
- It is the result of 2 x height + 2 x width + 1 x longest side
- Please note:
 - max. height = 60 cm
 - max. width = 80 cm
 - max. length = 200 cm

1. Example: Your parcel is
 - 30 cm high, 40 cm wide and 100 cm long
 - ➔ Belt measure = $60 + 80 + 100 = 240$ = permitted
2. Example: Your parcel is
 - 60 cm high, 60 cm wide and 150 cm long
 - ➔ Belt measure = $120 + 120 + 150 = 390$ = not permitted
3. Example: Your parcel is
 - 10 cm high, 10 cm wide and 210 cm long
 - ➔ max. length exceeded = not permitted
